

Ensure the Integrity of Your Results

Our Values

We offer the convenience of a single vendor for all qualification services for your scientific and laboratory equipment. Our multi-vendor services support all third-party products to support you on your path to compliance and success.

Our industry-proven, all-inclusive, consistent and reliable approach to qualification for Chromatography Systems controlled by the Waters® Empower® CDS system delivers solid operational qualification procedures.

- **Reduced Testing Time**
- **Consistent Testing Procedures and Results**
- **Qualification Processes Tailored to Your Unique Needs**

Ensure the Integrity of Your Results

Selecting the right compliance processes for your laboratory is essential for the success and efficiency of your work.

We provide qualification solutions to help ensure ongoing compliance. The qualification process is necessary after the installation of a new device, system relocation, repairs, or any other activity in order to facilitate regulatory requirements.

All services are performed by our experts who are trained on all major manufacturers' equipment.

Our Regulatory Products Group works with your team:

- We collaborate with your quality team to fully understand your specific needs
- We design, develop, test and deliver custom processes that meet all of your requirements
- We provide you with qualification protocols written in accordance with the original manufacturers' technical equipment specifications
- We work on your site and conduct each test with certified measuring equipment
- We support your qualification needs with experts trained in GxP

Qualification activities contribute to compliance with the GxP regulations: which in turn ensures that a successfully completed qualification series will ready the system for entrance to a consumer validation project.

A Unity Qualification package will allow you to become productive in a regulated environment faster.

Have more questions about compliance?

Our Regulatory Products Group is available to assist with your compliance needs at support.compliance@thermofisher.com
